

SIDHANT KUMAR

Software Developer | Backend Developer
sidhantkr4478@gmail.com | 6202344648 | LinkedIn | GitHub
Portfolio: sparkle-showcase-77.lovable.app

PROFESSIONAL SUMMARY

Motivated and detail-oriented final-year Electronics and Communication Engineering student with a strong interest in Software Development, Backend Development, AI, IoT, and Embedded Systems. Skilled in Java, REST APIs, SQL, Python, JavaScript, and Data Structures & Algorithms. Experienced in developing AI applications, embedded systems, and IoT solutions through academic and personal projects. Passionate about solving real-world problems and building scalable, high-quality software.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Backend: Spring Boot, REST APIs

Frontend: HTML5, CSS3, JavaScript, React.js

Database: MySQL, SQL, DBMS

Tools: Git, GitHub, VS Code, Cursor, Claude, Arduino IDE

Embedded & IoT: ESP32, STM32, Arduino, RFID, MPU6050, Ultrasonic Sensors, IR Sensors

PROFESSIONAL EXPERIENCE

- **Galactic-3D** — Web Development Intern | Aug 2026
- **SkillCraft Technology** — Web Development Intern | 1 Jul 2026 – 31 Jul 2026
- **CodSoft** — AI Intern (Virtual) | 10 Jul 2026 – 10 Aug 2026
- **InAmigos Foundation** — AI Web Development Intern | Jul 2026 (2 Weeks)

PROJECTS

SSB AI Mentor

- Mentored SSB aspirants using AI-based guidance, mock interviews, and personalized preparation strategies.
- Helped candidates improve communication, confidence, leadership skills, and overall SSB performance.

Technologies: Python, AI/ML, NLP

AI Interview Preparation Platform

- Built a full-stack web application delivering AI-powered mock interviews with real-time feedback.
- Developed an interactive React.js frontend backed by a Python service for dynamic question generation.

Technologies: React.js, Python, JavaScript, HTML, CSS

AI Image Captioning System

- Developed an AI-based Image Captioning system using Computer Vision and NLP.
- Extracted image features with a pre-trained ResNet model and generated captions using a Transformer-based architecture.

Technologies: Python, TensorFlow/PyTorch, ResNet, Transformer, NLP, Computer Vision

Smart Rider Safety Helmet System

- Designed an IoT-based smart helmet system for rider safety and automatic accident detection.
- Integrated MPU6050 sensors to enable crash detection and helmet-wear monitoring.

Technologies: Embedded C, ESP32/STM32, Arduino IDE, MPU6050, IoT

EDUCATION

Cambridge Institute of Technology, KR Puram, Bengaluru

Bachelor of Engineering, Electronics and Communication Engineering | CGPA: 7.37

CERTIFICATIONS

- InnovaHack Chapter 1 — National-Level Hackathon, Elite Forums (Mumbai, Jul 2026)
- Artificial Intelligence: Concepts and Techniques — NPTEL (IISc Bangalore), Jul–Oct 2025
- AWS Networking Basics — AWS Training & Certification
- Cybersecurity Job Simulation — Mastercard — Forge
- Controllers Job Simulation — Goldman Sachs — Forge
- Cyber Job Simulation — Deloitte — Forge

ACHIEVEMENTS

- Participated in InnovaHack Chapter 1, a National-Level Hackathon focused on technical innovation, held in Mumbai (July 2026).
- Certificate of Appreciation — "India Inspires" State-Level Online Quiz Competition, Disha Bharat (18 October 2024)
- Developed multiple AI, IoT, and Embedded Systems projects spanning computer vision, web, and robotics.

INTERESTS

Backend Development • Software Engineering • AI & Machine Learning • IoT • Embedded Systems • Data Structures & Algorithms • Open Source • Competitive Programming
