

Appreciation

for being an

Ambassador for Sustainable Premises

Awarded on 14 December 2025

Galactic 3D Private Ltd.

Cambridge Institute of Technology

Basavanpura Main Road, K. R. Puram, Bangalore – 560036, Karnataka

Based on the evidences submitted, a thorough verification was undertaken,

After which it has been decided to present the

‘Sustainability Audit’ Certificate

The Space where the facility is present was found to have an AQI of 118 and 24°C internal temperature

2D benefits of the 3D printing facility include measures such as

“Reduced material waste, faster prototyping, on-demand production, cost-effective for small runs and less energy consumption.”

Waste and significant impact include that overall 3d printing can have a smaller environmental footprint compared to traditional methods as it reduces waste, energy consumption and the need for large scale manufacturing setups, leading to a sustainable process
