

GALACTIC 3D

TRAINING, SKILL & ENTREPRENEURSHIP DEVELOPMENT

"From Learning to Leading in Additive Manufacturing"

GALACTIC 3D

Galactic 3D is your one-stop destination for advanced manufacturing services. As experts in the field, we bridge the gap to the future with cutting-edge technology and expert support. We offer customized, efficient, and high-precision solutions across industries, delivering unmatched quality and innovation with every project.

Our services span across four key verticals:

- **Design, DFAM & Data Preparation**
- **Contract Manufacturing & Part Printing**
- **Training, Skill & Entrepreneurship Development**
- **Capital Equipment Manufacturing**

MENTORSHIP | COMPETENCE | EMPOWERMENT

Learn the endless possibilities of **AM** and its associations with **GenAI , ChatGPT & ML**. Whether you're a student, professional, or executive, our training programs are designed to prepare you for a world of limitless possibilities in design, production, and innovation.

Mission

To foster the next generation of innovators and leaders in advanced manufacturing through world-class training and education.

Vision

To make Additive Manufacturing an integral part of education, empowering learners to drive industrial transformation sustainably.

Why Choose Us ?

Industry-aligned curriculum.

Access to state-of-the-art facilities.

Expert trainers and real-world projects.

Internships & Placement assistance and career pathways.

School's Program Scope

Our school training introduces students to a Age appropriate 3D printing learning modules through hands-on, STREAM-based learning. It nurtures creativity, problem-solving, and technical skills, preparing young minds for future careers in technology and innovation for Real-world applications.

Level 1 : 3D Printing Designer (Consumer)

Introduces students to 3D design fundamentals, enabling them to create basic consumer-friendly models for everyday use. Focuses on utilizing design software and preparing files for 3D printing

Level 2 : 3D Printing Technology & Operation

Students gain hands-on experience with 3D printing data preparation techniques & machine operation.

Level 3 : 3D Printing Application Developer

Focuses on 3D printing applications for home decor, automotive, drone & lifestyle.

Level 4 : 3D Innovator

Equips students in designing & developing their own 3D printer for multiple purposes.

Institution's Program Scope

The program introduces 3D printing, fosters skills through hands-on learning with a comprehensive curriculum , and guides students from design basics to advanced Additive manufacturing machine building for future tech opportunities which is Industry relevant & Career Focused.

Level 1: AM Designer & Industry 4.0

Introduction to Additive Manufacturing & CAD Modelling, Design for Polymer AM & Topology Optimization, Generative Design & Innovation, AI & ML in Manufacturing, IoT & Automation principles associated with Industry 4.0, Gen AI, ChatGPT & ML

Level 2: AM Engineer

Introduction to Additive Manufacturing, AM Machine Architecture, Material Science in AM, Slicing Software & Print Parameters, Data Preparation & Simulation (FDM/DLP/SLS), Comparative Study, Capstone Project & Review.

Level 3: Design Thinking & DFAM

Design Thinking for Innovation, Prototyping & Social Innovation, DfAM for Polymers, Optimization for AM, Capstone Project (Design & Simulation), Part Printing comparative Case study.

Level 4: AM Specialist (Metal AM & Industrial Visits)

Introduction to Metal AM, Overheating in DMLS, Basics of AM Data Repair, Designing Support-Free Metal AM, Reference Point Calibration, EOSPRINT Software, Monitoring with EOSTATE, Business Case for AM, Tooling Design, Hands-on Build Preparation, Advanced Parameter Editing, Post-Processing & Surface Finishing, Ensuring Print Quality, Application Sprint (Capstone Project), Industrial Visit.

Industry Program Scope

Our school training introduces students to a Age appropriate 3D printing learning modules through hands-on, STREAM-based learning. It nurtures creativity, Our Industry-Specific training equips professionals with practical expertise and Hands on training in Additive Manufacturing, from design to machine operations and post-processing. Tailored for SME/ MSME needs with Expert-Led learning , it drives innovation, efficiency, and real-world AM implementation.problem-

solving, and
applications.

PG Diploma in Additive Manufacturing

A comprehensive program for professionals, focusing on AM technologies, material science, and industrial applications. Learn how to integrate 3D printing into production processes for diverse industries.

(Duration : 1 Year & 2 Years)

Certifications in Additive Manufacturing

Specialized courses for professionals to enhance their skills in specific areas of AM, including DFAM, material for AM, and applications. These certifications provide practical knowledge to solve industry challenges using AM technologies.

(Duration : 6 months)

Executive Certifications

Designed for industry leaders, this program offers high-level insights into the strategic use of Additive Manufacturing. It covers business applications, cost analysis, and supply chain integration in AM.

(Duration : 3/6/9 months)

Level 4 : 3D Innovator

Tailored training for industries such as aerospace, automotive, and healthcare, focusing on applications of AM in each sector. Courses cover Design Thinking, DFAM, Material science, Machine operation, and more.

(Duration : As per the requirement)

OUR CORE TEAM & COURSE CONTENT

A highly qualified expert team with 30+ years of experience, including Ph.D. holders, M.Tech graduates, and industry professionals, specializing in advanced manufacturing technologies and fostering innovation in training and curating course content approved by EOS and the Board of Studies.
